

## Graffito

design : CRS

Graffito is a felt rug created by joining felt strips with different dimensions and with appliquéd design.

Felt thin rectangles are sewn with different inclination on each felt strip with Punto Zigzag, according to a predetermined pattern.

The strips are then sewn together with Punto Zigzag.

The number of designs varies according to the dimension of the rug.

The border features the Punto Pettine.

This rug can be produced both with a single layer and a double layer of felt.

In the double-layer rug the underside is always without ornamentation and in one colour. Only in rugs with a width higher than cm 200 the underside shows inner stitching.
