

Honeycomb

Alberto Meda 2008

Honeycomb is a light and easy-to-use folding versatile chair. It has an aluminium frame, while its backrest and seat are made of transparent or mass-tinted polycarbonate. The refinement of the structured texturisation, divided into hexagonal honeycomb modules, confers on this chair not only the aesthetics of three-dimensional decoration, but functionality, lightness and ergonomomy as well. Perfect for outdoors and small spaces, the folding Honeycomb chair is just 7 cm wide when folded.
