

SETTE MAGIE FLOOR LAMPS

1989 - Lella & Massimo Vignelli

Description

SETTE MAGIE collection is one of the best expressions of the project approach by Massimo & Lella Vignelli: on the one hand a careful and visually powerful design of its lines, on the other a strong connection with Italian handicraft which results in an intellectually challenging, unique and timeless product. The element which combines the design of all the items in SETTE MAGIE collection is the cylindrical metal structure, updated with metalized painting in three contemporary nuances instead of the original gold and silver leaf coating and micaceous iron painting, characterized by the distinctive graphic sign of the sequence of seven bright holes. SETTE MAGIE floor lamp is made of a single-section cylinder with a micaceous grey metal base and LED lighting which includes a remote control to help adjust the intensity and colour temperature of the light.

Finishings

Cylinder with metallic finish in light nickel, bronze tobacco, titanium. Base in gray micaceous finish. Contains a LED light source, with remote control for adjusting both the intensity and the color temperature of the light.

Technical info

MAINTENANCE NOTES

VARNISHED PARTS:

gently rub down with a damp cloth (water + neutral soap). Do not use alcohol or detergents.

USE CAUTIONS

Important: before replacing the light bulbs, carefully read the technical data and instructions in the light pack. Only qualified professional electricians should service the electrical parts.
