

ARCO Casegood

STRUCTURE

Bases and tops made of 1.8 cm particle board panels, Eco veneered lacquered on both sides or Eco veneered.

The invisible full extension glide system has a galvanized metal structure, tecnopolymer castors and safety lock. It allows for vertical and horizontal adjustment as well as soft closing and full extension. Glides are supplied with partial extension; they are available with full extension upon request and at a surcharge.

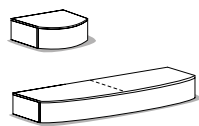

Drawer fronts made of panels (the front is curved) and shaped MDF sides; lightweight interior, lacquered on both sides or wood veneered on both sides.

A groove on the sides allows for the drawer opening

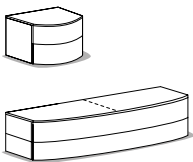

Due their unique design, the Arco modules cannot be stacked to a wall panel; it is not possible to use LED lights on the back of the modules.

All the floor sitting modules are equipped with a wall anchoring device for safety reasons.

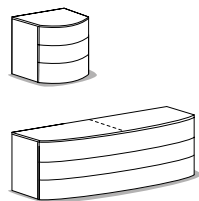

DIMENSIONS

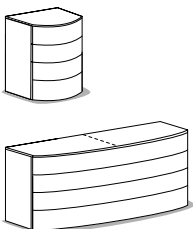

1 DRAWER UNIT
