

DEDALO Casegood

STRUCTURE

Made of curved solid wood and particle board panels lacquered with water based paint or wood veneered.

The invisible full extension glide system has a galvanized metal structure, tecnopolymer castors and safety lock. It allows for vertical and horizontal adjustment as well as soft closing and full extension.

The handle function is performed by the drawer front that is taller than the structure.

The recessed plinth creates a slot in the perimeter making it easier to stack the modules.
