

STRUCTURE

Sides, bases and tops made of 2 cm board panels.

The invisible full extension glide system has a galvanized metal structure, tecnopolymer castors and safety lock. It allows for vertical and horizontal adjustment as well as soft closing and full extension.

“Legno” drawer fronts made of 2.2 cm thick particle board panels, Eco veneer matt lacquered on both sides or wood veneered on both sides.

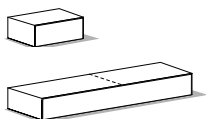

“Composti” drawer fronts made of 1.8 particle board panels with synthetic cover with a glass, mirror or slate front glued on the panel.

Opening with Push-lacht system.

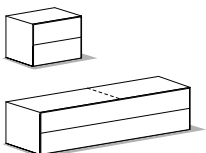

Due their unique design, the Tecno modules cannot be stacked to a wall panel; it is not possible to use LED lights on the back of the modules.

All the floor sitting modules are equipped with a wall anchoring device for safety reasons.
