

## River

—  
Design Sergio Bicego

Anno di produzione 2011

Production year 2011

[It] — River è un sistema di sedute dalle forme morbide che ricreano un andamento sinuoso simile al corso di un fiume. Un sistema dai volumi curvilinei e naturalmente “in movimento”, dove il dialogo tra linee concave e convesse dà vita a composizioni di forte impatto scenico. Un divano “da costruire” in estrema libertà che per attitudine ed ergonomia si presta sia a contesti abitativi che pubblici. River si avvale dell'utilizzo di materiali pregiati, poliuretani a densità differenziata di notevole elasticità e portanza, mentre lo schienale acquisisce morbidezza attraverso la presenza di maxi cuscini in piuma trapuntati. Il decoro a contrasto (che ricorda il punto-cavallo) si sviluppa lungo tutte le cuciture enfatizzandone forme e carattere per una resa allo stesso tempo elegante e casual. Un incontro di attitudini, dettagli, pieni e vuoti per un living da creare e ricreare secondo le proprie inclinazioni e fantasia. Completamente sfoderabile e disponibile in nuovissimi rivestimenti pensati ad hoc per la sua silhouette.

### Struttura

In legno imbottito con poliuretano espanso a quote differenziate (per la seduta 40IM - 25IM - 30IP, per lo schienale 25IM - 75IP - 30P). Il tutto rivestito con vellutino accoppiato a fibra poliestere 150gr/mq. Il molleggio della seduta viene assicurato da cinghie elastiche con anima in polipropilene.

### Piedini

In ABS diametro 60 mm, altezza 30 mm.

### Imbottitura

Il cuscino trapuntato morbido è imbottito in piuma d'oca lavata e sterilizzata rivestita con tessuto di cotone bianco 100%. Nell'altra versione di cuscino trapuntato viene aggiunta un'imbottitura con anima in piuma e fibra di poliestere rivestita in tessuto di cotone bianco 100%. Mentre il cuscino 60x50 cm è imbottito con piuma d'oca lavata e sterilizzata e fibra di poliestere 100% suddivisa a scomparti.

[En] — The River seating system curves gently like a meandering watercourse.

The natural sense of movement created by its curvaceous volumes opens up a dialogue between the convex and concave lines, giving compositions a strong visual impact. This modular seating range offers great freedom of composition, and its design and comfortable shape make it the perfect addition to residential or public settings. River is made of top quality materials, including particularly elastic, resilient variable-density polyurethane, while large quilted feather cushions make for a particularly soft backrest. The contrasting decorative motif (reminiscent of blanket stitch) runs along the seams to emphasise their shape and character and to create an elegant, informal look. A combination of form, details, solids and voids to create and recreate a living environment to suit our personal moods and tastes. With a range of brand new fully removable covers, designed specifically to suit this unique shape.

### Structure

In wood upholstered with variable-density polyurethane foam (for the seat 40IM - 25IM - 30IP, for the backrest 25IM - 75IP - 30P). The entire piece is covered with velveteen on polyester fiber 150gr/sqm.

The seat is sprung with elastic straps reinforced with polypropylene.

### Feet

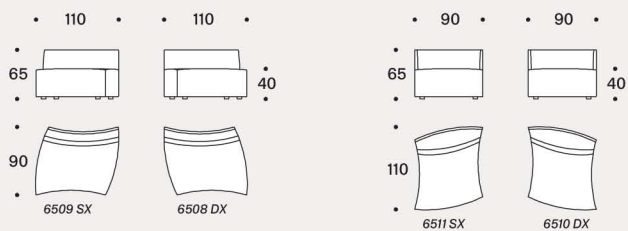

In ABS, diameter 60 mm, height 30 mm.

### Padding

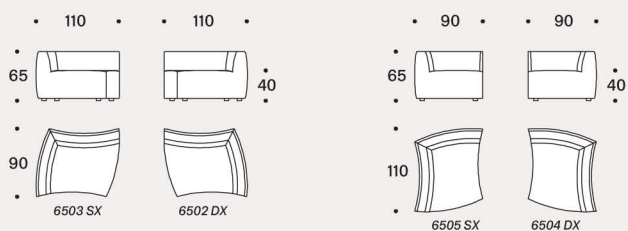

The soft quilted cushion is filled with washed and sterilized goose down covered with 100% white cotton fabric.

In the other version of quilted cushion is added an upholstered with feather core and polyester fiber covered with 100% white cotton fabric. While 60x50 cm cushion is padded with washed and sterilized goose down and 100% polyester fiber divided in compartments.
