SAN MARCO

Maurizio Di Mauro architetto

DESCRIPTION

Metal and wood dictate the beauty and charm of San Marco in their chromatic and material plays, which is essential in its balance of elements. Headboard and body are isolated by a thin cylindrical element - fanciful decoration in solid wood and metal that enriches the ultra-basic profile of the bed. Choose whether to enrich your San Marco with the practical container box and whether to choose it in its low - more classic - or high version - where the wood and metal structure becomes the bed more intriguing.

TECHNICAL INFORMATION

Typology

Bed

External structure

Solid canaletto walnut with metal connection | solid ash with metal connection

Headboard and bedframe

Structure in wood covered in differential/density polyurethane with dacron layers and fine velvet in nylon fibre.

Cover

Completely removable in fabric | Not removable in leather
