LINGOTTO Bed Side Table

Maurizio Di Mauro architetto

DESCRIPTION

Style becomes comfort with Lingotto bedside table, part of a series of bifacial containers with a unique personality, unconventional and elegant, real jewels capable of imposing their beauty and making it the protagonist of any environment. A uniqueness that arises from the play of color and material combinations and the superimposition of the various modules. The doors, the drawers with total extraction and the baseboards with metal finishes are just some of the technical aspects that characterize the collection in a modern and creative sense of pure design. The bedside table is no exception in its uniqueness, elegance and light-heartedness: all depends on the color you choose!
