

FLOW (INDOOR + OUTDOOR)

design Shibuleru

Rocking chair available for indoor and outdoor.

Indoor version: supporting frame in Ø25mm tubular steel coated with polyester epoxy powder gunmetal grey colour and black PVC runners. Non-removable upholstery, hooked to the frame through technical parts coupled to it, available in fabric or leather sewn together with a supporting material. Headrest in polyurethane foam covered with fibre layers, integrated into the covering. Small armrest in Stainless Steel AISI 316 sheet, secured to the frame with screws in Stainless Steel, coupled with non-removable black hide or coated with polyester epoxy powder gunmetal grey colour.

Outdoor version: supporting frame in Ø25mm tubular Stainless Steel AISI 316 coated with polyester epoxy powder gunmetal grey colour and black PVC runners. Non-removable upholstery hooked to the

frame through technical parts coupled to it, available in the outdoor fabrics only, sewn together with a supporting material. Headrest in DRYFEEL S and fibre layers for outdoor covered with a waterproof fabric protection, integrated to the covering. Small armrests in Stainless Steel, secured to the frame with Stainless Steel screws, coated with polyester epoxy powder gunmetal grey colour. For both versions, upholstery available woven with an hypoallergenic, recyclable, eco-friendly tubular (Ready made UnPizzo) suitable both for indoor and outdoor, in the colours in collection. For the woven version only the headrest, not integrated into the covering, is joined to a counterweight in Stainless Steel AISI 316 coated with epoxy powder gunmetal grey colour, by a weaving (made by UnPizzo) always in the same colour of the seat part.
