

HINGE TABLE

design Francesco Rota

Coffee table available with four different tops of 12mm shaped clear tempered glass. Each glass can be used with two different structure combinations. Base made of Ø20mm lathe-tapered steel bars of 35cm height and Ø16mm steel tubular spacers, in sizes 30/60/90cm, to be

combined to obtain different configurations. Epoxy powder coating in RAL-K7 9010 white, RAL-K7 9017 black or gunmetal grey colour. The table, packaged as a kit, should be assembled following the instruction attached.
