DEW DROPS
Nature's gems on blades of grass.

Dew drops sparkling on a thin blade of grass expose the elemental beauty of nature that continues to fascinate us. The intimately familiar, yet still charming, shape of dew drops inspired this collection with its precise details.

Lit by an internal light source offering an exceptional esthetic experience, the crystal objects, with hints of iridescence, adhere tightly to hand-sewn bands from an innovative material or high-quality leather.

Handmade glass attributes

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.

The intensity and color shade of the iridescent metal-coating may vary slightly from product to product. Small dots in the coating, especially visible after the light is on, are not a defect of the product.
