

Side table composed of a steel base and copper bowls that can be removed and used as containers.

Structure: gloss varnished steel in a colour matching the colour of the bowls.

Bowls in copper available with:

- an abstract decoration in three colour options: light green, dark green or red;
- a circular geometric decoration.

The decorative enameling of the copper bowls of Ebe side table is done by hand with Paola Lenti exclusive colours by Alessandra Malfatti.

Notes:

The seven bowls composing Ebe side tables have different shapes and dimensions. Each bowl is simply placed onto the structure to allow for its use as an independent container.

The internal and external enamel of the Ebe bowls is obtained with manual production techniques that make each bowl different from the others, unique and exclusive. The particular processes used create differences in color and motif even between bowls of the same table. Irregularity, both of the colours and the surfaces, is their distinctive feature.

Awards: Ebe series has been awarded with the NYCxDESIGN AWARDS 2022.
