

Series composed of armchair, sofa and lawn swing with non removable upholstery directly hand woven onto the structure.

**The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.**

**Structure and base:** natural sassafras wood, plastic spacers.

**Seat frame:** stainless steel AISI 316 with elastic belts.

**Structural weave:** made by hand onto the structure with a linen braid padded with linen.

**Seat cushion:** independent with removable cover, in polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

**Cm 50x60 back cushion:** independent with removable cover, in polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

**Loose cushion:** independent with removable cover, in polyester fiber, fixed foam covering in waterproofed polyester.

**Upholstery cover for all the cushions:**

- Lino Grezzo
- Lino Délavé
- Canapa Délavé

**Notes:**

Seat cushion is also available upon request in natural latex, paineira vegetable fiber and woolen felt, insert with elastic steel springs, fixed covering in 100% cotton fabric.

The entirely natural padding of the seat cushion guarantees the same comfort of a traditional synthetic padding.

The paineira vegetable fiber is water repellent, non-allergenic and completely biodegradable.

The lawn swing is supplied complete of safety certified linen cords provided with a fastening system in stainless steel AISI 316.

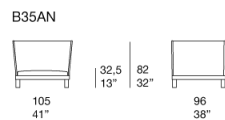

The cords of the lawn swing are meant for a standard suspension height of 260/270 cm calculated from the bearing ring to the base of the sofa.

The sassafras wood is treated against stains and water with water-based products that limit the absorption of liquids and greasy substances.

The change in colour and the superficial splits that might appear are typical of the wood natural evolution.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
