

Console.

The Lio series also includes side tables available in different dimensions.

Structure: AISI 304 stainless steel, gloss varnished (reference colours: Mano Lucida wood sample collection), plastic spacers.

Support surface: aluminium, gloss varnished in a colour matching the structure.

Top: Cristal.

Notes:

The Cristal tops are made by interposing a layer of fabric between two sheets of transparent extralight tempered glass. This whole is made integral by a film of thermosetting material, which allows to generate strong three-dimensional connections and which guarantees the stability of the stratification over time. Once the stratification is obtained, the thickness of the top is sealed in order to allow it to be used outdoors.

This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
