

Cosmo is a rug for exterior and interior environments hand made with a one- or two-colours cord.

The elements composing the surface of the rug are completely hand-made; the elements feature different dimensions and production techniques: some are created by sewing the cord in a spiral-like pattern; others are shaped to form round decorated modules.

The elements are then joined together with machine stitches using a yarn of the same colour as the cord.

The floor can be seen through the gaps within and between the elements.

Only one colour can be chosen.

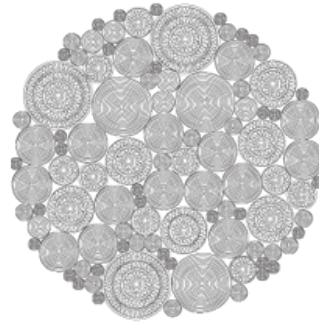

The handwork and the preciousness of the designs advise against the use of Cosmo in high traffic areas.
