

Samo is a modular rug for exterior and interior environments created with cords in mélange colours which are sewn together lengthwise.

The extremities of each cord are finished with a fringe which is always featured on the short side of the rug.

Only one colour can be chosen.

The width of the braids is about 25 mm. The dimension of the short side is determined by the multiple of the braids and will often vary.

The slightly irregular shape of each piece is the result of the hand working technique used to produce this rug.

We advise against the use of Samo in very humid or rainy environments.
